LIVE GREEN. CHARLIE'S SOAP DEEP CLEAN.

# Clean your pets and livestock safely

It's not just clothes, things and people that can get dirty and filthy. Through usually no fault of their own, animals can get themselves coated in anything and everything: from food and waste, to mud and even oil. Animals need to be cleaned safely and effectively, and cheaply if possible. While not originally developed for washing critters of the two or four-legged variety, *Charlie's Soap Indoor/Outdoor Surface Cleaner* can tackle even this job. A little goes a long, long way. Charlie's Soap is safe for use on pretty much any animal. It works very well on blood, mud, skunk spray, heavy oil such as from a spill. And, the longer you allow Charlie's Soap to sit, the better it cleans. Charlie's Soap is …

**The GREEN.**
97% biodegradable in just a month. (Japan Food Research Labs)
Rated safe for use around lakes, streams and oceans.
Charlie's Soap is non-toxic.

**That CLEANS.**
Targets the stains, not the animal.
No gloves or masks required.
Safe for you and your animals' skin.
Rinses away completely. (Clemson University School of Textiles)

**If washing in a bath/basin:** Use Charlie's Soap Indoor/Outdoor.

1. Mix ¼ cup of Indoor/Outdoor per 5 gal of water.
2. Stand animal in bath and lather up fur or feathers.
3. Avoid contact with eyes as it will sting but cause no harm.
4. Rinse thoroughly. *Please keep in mind that Charlie's Soap will remove most natural oils from aquatic animals' fur or feathers. Keep them from water until their bodies regenerate the oil, lest they have trouble swimming.*

**For hand and hoof washing**: Use Charlie's Soap Indoor/Outdoor half to full strength.

1. Wet hands (or paws, or hooves).
2. Apply Indoor/Outdoor mixture to animal conservatively.
3. Scrub animal to lather up hands (or paws, or hooves).
4. Avoid contact with eyes as it will sting but cause no harm.
5. Rinse thoroughly. *Please keep in mind that Charlie's Soap will remove most natural oils from aquatic animals' fur or feathers. Keep them from water until their bodies regenerate the oil, lest they have trouble swimming.*
